Dear Carriers,

Further to advice sent by DP World on 2nd December 2022 about the impending introduction of a calibrated weighing device (Pondus) at the Melbourne Terminal.

We would now like to advise that import containers will begin to be statistically sampled and weighted on the Pondus stand from 1st Oct 2023.

A reminder that any unit having an absolute weight variance greater than one metric tonne compared to the declared weight will attract the "weight mis-declaration fee for import cargo".

This fee will appear on your 1-Stop invoice and customers will have access to a certified weighing certificate.

Containers that record an absolute weight variance less than one metric tonne, will not incur the fee.

Fee Type	Chargeable Unit	Current Fee	Fee
Weight Mis-Declaration Fee	Per Import Laden Unit	N/A	\$232.00

The introduction of this fee is to mitigate the safety hazards associated with mis-declared containers throughout the supply chain network.

All fees are EXCLUSIVE of Good and Services Tax (GST)

Yours sincerely,

Michael Fogarty
Landside Superintendent
